

NEW, SUPER UPGRADED, DOUBLE-STRENGTH ANTIOXIDANT FREE RADICAL CONTROL FORMULA

***Possibly the World's Most Powerful & Complete Antioxidant Formulation Ever Devised;
A Near-Miraculous Formulation to Cleanse the Cellular System of Veracious Free Radicals
--the "Pac Men" of Death and Disease.***

Based on continued findings about the mechanisms of aging, the lust for longer life has become a scientific reality. The phenomenon known as aging is a result of a number of pathological changes that are somewhat controllable using existing technologies. By prolonging our health lifespan, we put ourselves in a position to take advantage of future breakthroughs that could result in dramatic extensions of human lifespan. The common denominator in all AGE RELATED DISEASE is "FREE RADICAL DAMAGE TO THE CELLS". These "Free Radicals" are cellularly impaired Pac Men with a voracious appetite for cellular tissue. This is the very first instigation of all disease be it Heart Disease, Cancer, Nervous System Breakdown or Brain Cancer and Alzheimer's Disease. This extraordinary formulation uses Ancient Wisdom from the sciences of Chinese and Ayurvedic Medicine in conjunction with the very latest scientific breakthroughs from the West. Some of the ingredients utilized are being released to the world for the very first time in this formulation while others have been revered and administered for hundreds of years because of their power and efficacy.

INGREDIENTS: Selenium (as Selenomethionine); Zinc (as OptiZinc, the world's most powerful form of Zinc); Beta Carotene; Vitamin E (as dl-alpha tocopherol); Chaparral; Curcumin (as Turmeric Extract); Schizandra Fruit; Green Tea Polyphenols; Amla Fruit; Ocean Source Mineral/Trace Mineral Complex; Flax Seed Oil Powder; Ocean Sourced Peptide/Amino Acid Complex; Proanthocyanidin Complex (Marine Pine Bark); Micro-Milled Chlorella; N Acetyl-L-Cysteine; Ginkgo Biloba Extract 24/6; Bilberry Extract; Bioperine Patented Extract; Astaxanthin Super Antioxidant Complex.

SELENIUM: The new "miracle mineral" that has been proven in trials at the University of Arizona to reduce cancer rates by 50% within six months. Possibly the most powerful antioxidant mineral in existence while working with Vitamin E to prevent fat and cholesterol accumulation in the blood. It protects against heart weakness and degenerative diseases while enhancing elasticity of skin tissue.

ZINC: The critical mineral for the thymus gland to produce vital T-cells, the "foot soldiers" of the body's immune system army. Also controls the prostate and fights prostate cancer and enlargement. Zinc is also a coenzyme of SOD that protects against free radical damage and is essential to formation of insulin and to maintaining immune system, gland and sexual and reproductive health. The form of Zinc utilized in this formation is "OptiZinc" from the famous InterHealth Biotechnology company in San Francisco and has been widely tested and confirmed as having the highest assimilation capacity available.

BETA CAROTENE: A Vitamin A precursor, converting into Vitamin A in the liver as the body requires it. A very powerful anti-infective and antioxidant for immune health, protection against environmental pollutants and also dramatically slows down the aging process. Very effective on all respiratory diseases and infections and helps prevent lung cancer and tumor growth.

VITAMIN E: The "third sister: to Vitamins A and C as the "troika" of cellular health protectives. Important for all immune function and an effective antioxidant and vasodilator against blood clots and all heart disease. Voluminous research now confirms that Vitamin E works with Selenium (see above) to fight all forms of Cancer, Parkinson's Disease, Arthritis and Lupus. It also helps control baldness and muscle and nerve degeneration.

CHAPARRAL: The American Indians thought Chaparral to be a "gift from the Gods" to fight all disease. Found across the southwestern mountains of the United States and northern Mexico, it has been used for centuries to fight parasites, infections, cold sores, joint pains and to reduce inflammation and pain. The major lignan in Chaparral is called "Nordihydroguaiaretic Acid" or NDGA which is a highly potent antioxidant and thought by some scientists to be a potential cancer treatment.

CURCUMIN: Also known as "Turmeric" in Ayurvedic Medicine. Used for thousands of years in the Indian Materia Medica, it is only now that this extraordinary compound is being "discovered" and released here in the West. Latest research confirms its potent anticancer and anti-tumor fighting capacities and is one of the very latest in antioxidant, free radical control technology.

SCHIZANDRA: Once the revered Herb of Immortality and the exclusive domain of Chinese royalty. It is one of the very few herbs that contains all Three Treasures of Chinese Medicine and revered as a beauty tonic and considered to be a youth preserving herb. Also said to be an excellent sexual tonic when consumed regularly and is thought to possess powerful antioxidant or antiaging capacities.

GREEN TEA POLYPHENOLS: Green Tea contains a catechin called a "Polyphenol" which is a phytonutrient now being hailed as one of the great cancer preventatives ever discovered. Surveys conducted in Japan show that people who consumed Green Tea had much lower incidence of stomach, liver, pancreatic, breast, lung, esophageal and skin cancers. In some studies, Green Tea prevented cancer altogether in animals genetically bred to develop cancer. Green Tea Polyphenols also neutralize cancer-causing agents; protect cells against mutation from cancer causing agents; protect against cellular damage from ionizing radiation. It is also thought that Green Tea Polyphenols can protect against cardiovascular disease by inhibiting abnormal clotting inside vessels and reducing total cholesterol and elevation of the "good" HDL cholesterol.

AMLA FRUIT: Mother Nature's richest source of Vitamin C, which is the recognized super-antioxidant, free radical fighting Vitamin. DR Linus Pauling, the Nobel Peace Prize Laureate theorized that sufficient Vitamin C would wipe out strokes, heart attacks and most forms of Cancer. Of all the animals on the planet, mankind is the only one not able to synthesize Vitamin C in its body. Is this why dogs don't get strokes? Vitamin C is also the "cellular cement" that holds cells together and thus, turns back the clock of aging.

OCEAN SOURCE MINERAL/TRACE MINERALS: All 84 mineral and trace mineral elements required for the body to operate at peak efficiency. Particularly high in Magnesium, "the mother mineral" to calm the nervous system, activate Calcium and regulate the heartbeat.

FLAX SEED OIL POWDER: Powerful source of essential fatty acids, in particular, Omega-3, which has been proven to assist PMS, high blood pressure, rheumatoid arthritis and also to lower serum cholesterol levels. They provide fuel for the heart, help prevent blood clotting and reduce high blood fats of all kinds.

PROANTHOCYANIDIN COMPLEX: The antioxidant complex derived from Marine Pine Bark and revered by the American Indians as a prevention of scurvy or "cellular death." This is also a description of free radical disease. Fifty times stronger than Vitamin E and twenty times more powerful than Vitamin C. Marine Pine Bark has been proven here in the West to be one of the most powerful of all the antioxidants and also of note, able to pass the "blood/brain barrier" and thus wash dangerous free radicals from delicate brain tissue.

MICRO-MILLED CHLORELLA: The super-green food. Contains a higher concentration of Chlorophyll than any other known plant. It is a complete protein food, with all the B Vitamins, Vitamin C and E and a host of minerals and trace minerals. Chlorella is highly effective in eliminating heavy metals like lead, mercury and cadmium. Antitumor research shows it is an important source of Beta Carotene in healing. It strengthens the liver, the body's major detoxifying organs so that it can rid the body of infective agents that destroy immune defenses. In particular, Chlorella has dramatic stimulating effect on the body's ability to generate new DNA and RNA.

N ACETYL CYSTEINE: A powerful amino acid that is one of the few able to bond in a special way and maintain the structure of proteins in the body. It is a component of the antioxidant, Glutathione. In addition, Cysteine plays an important role in the communication between immune system cells.

GINKGO BILOBA: If the Dalai Lama comes to visit, he will present you with his favorite gift: a Ginkgo tree from his private garden. Used therapeutically for centuries to combat the effects of aging and to improve circulation throughout the body. It helps send more blood and oxygen to the brain for increased memory and mental alertness. As an antioxidant, it protects the cells against damage from free radicals and reduces blood cell clumping which can lead to congestive heart disease.

BILBERRY EXTRACT: Ultra-powerful antioxidant from the "anthocyanoside" complex. Used for centuries as an eyesight herbal remedy, it is now being hailed for its profound antioxidant abilities and its anticancer/anti-tumor capacities.

BIOPERINE: Also known in Ayurvedic Medicine textbooks as "Piper Nigrum Fruit Extract." Bioperine is the patented form of this extraordinary compound as researched and developed by the famous Sabinsa Biotechnology Corporation of New Jersey headed by DR Muhammad Majeed, the world's leading Ayurvedic Medicine researcher. Bioperine is a very powerful assimilation empowering ingredient that dramatically increases the assimilation of all the other ingredients utilized. The increase has been proven in laboratory tests to be as much as 40%-60% thus significantly enhancing the bioavailability of the total formulation.

ASTAXANTHIN: This is an ingredient even leading researchers have not heard of as yet. It is possibly the world's most powerful antioxidant being 1000% more powerful than Vitamin E. It is a member of the carotenoid family and comes from an ocean source. It not only possesses ultra-powerful antioxidant and free radical fighting capacities, it also shares with the Proanthocyanidin Complex outlined above as being able to pass the "blood/brain barrier" and thus wash dangerous free radicals from the delicate brain tissue. This has enormous implications for Alzheimer's Disease and brain cancer/ tumor patients.
